The Most Common Platforms Being Replaced

Cloud Environments We Support

We were initially skeptical that the migration from MicroStrategy to Tableau would be smooth. XeoMatrix nailed it and ensured that we were up and running quickly and that all of the data, reports, and processes were solid.

Empower Physical Therapy

Empower Physical Therapy needed a way to source financial data and present it to their investors. They had been using third-party software to manage schedules, billing, and transactions across all their locations. aXeoMatrix migrated them into a modern multi-platform BI environment that made it easy to quickly generate reports and demonstrate value to investors.
